

## Artwork List

Artist Info	
<b>Artist Name</b>	

Notes for completing artwork list:

- Give each work a unique title.
- Specific the materials and technique used in the production of the work including type of surface. In the case of photography, specify the printing technique. Do not use “mixed media” as a descriptor. The more specific you are, the better assessors can interpret the digital images provided.
- Centimeters are preferred for dimensions.
- You may include a separate list of artworks with annotations if there is further information about each artwork you would like to share.
